Outdoor Flooring
Resistant and sustainable

- Ultra-low maintenance
- Environmentally friendly
- Slip resistant
- Moisture resistant
- Stain Resistant
- UV fade resistant

Embrace the possibilities of a world inspired by nature.

Eva-Last®’s range of composite building solutions offer you premium outdoor living through innovative, durable and eco-friendly products. Eva-Last® manufactures and supplies bamboo-plastic composite decking as well as various accessories and systems to match. Whether you’re converting a dull patio area into a dreamy deck, transforming a lifeless wall into a masterful design feature or need expert installation advice on your next home improvement project, Eva-Last® has over a decade of experience as a tried and trusted composite building partner.

Premium, co-extruded boards with Dura-tech™ capping technology, making them ultra-durable and superbly weather resistant.

- Slip resistant
- Stain resistant
- High UV resistance
- Low maintenance
- High quality variable colour technology
- Durable and suitable for commercial use

Our most innovative composite product offers strength, durability and colour depth like no other. Infinity™ is built to withstand extreme temperatures and climatic conditions and it’s 25-year warranty is testament to its reliability.

BASIC COMPONENTS OF A DECK

1. Non-grooved board (For clean edges)
2. Grooved boards (For hidden fasteners)
3. Fascia (Trim the deck edges)
4. Substructure

Introducing Infinity™, the latest in bamboo-plastic composite innovation from Eva-Last®. Over a decade of product design, chemistry development and extensive testing led Eva-Last® to the development of Dura-tech™, a revolutionary surface material that gives Infinity™ its outstanding performance features.

The unique process used in the manufacture of Infinity™ achieves infinitely variable, authentic colour finishes that mimic the natural beauty of wood.

Infinity™ Dual finish profile
Co-extruded composite decking
GROOVED

Dimensions: 140 x 20 mm (4.8 m lengths)
Weight: 3.22 kg / m
Joist spacing: 300 mm on centres
Clips: 25 clips / sqm

The Infinity™ HD range is Eva-Last®’s next generation technology of textures that reveal that in-depth ultra naturalistic feature. With textures that are designed to emphasise a natural wood feel and aesthetic found only in nature. Infinity™ HD our most innovative product offers strength, durability and colour depth like no other.

Infinity™ HD COLOUR & FINISH

COLOURS - COMING SOON

*Only available in Distressed (J) Sculpted grain (L)

**COMPOSITE JOIST**

Composite joists are a cost effective option for use over existing slabs such as screed or tile flooring, paving and patio’s. Compared to standard deck installations, they are quick to install, requiring no posts or any other supporting structure. These joists have the added bonus of being highly durable, as they are made of composite Eva-tech®.

**JOIST FASCIAS**

- Joist dimensions: 40 x 30 mm (2.2 m lengths)
- Joist fascia weight: 1.64 kg / m
- Colour: CO2 Black

**STO8L**

**FASTENING AND STRUCTURAL SYSTEMS**

Eva-Last® has covered it all; along with superior composite technology, Eva-Last® has developed HULK - a unique and super durable brand of hidden decking clips and dual purpose screws, designed to simplify your installation.

**Recommended for use with all Eva-Last® installations, HULK clips and fasteners are the best choice for: deck construction and garden applications.**

**Eva-tech™ composite joists**

- Joist dimensions: 40 x 30 mm (2.2 m lengths)
- Joist fascia weight: 1.64 kg / m
- Colour: CO2 Black

**Sto8l**

**Eva-Last® has covered it all; along with superior composite technology, Eva-Last® has developed HULK - a unique and super durable brand of hidden decking clips and dual purpose screws, designed to simplify your installation.**

**Recommended for use with all Eva-Last® installations, HULK clips and fasteners are the best choice for: deck construction and garden applications.**

**Key features of HULK composite deck screws:**

1. The pan head works perfectly with HULK clips.
2. The flat bottom shape of the screw is designed to rest securely on top of a HULK clip, preventing movement and damage.
3. The thread and shaft work seamlessly with the substructure and HULK deck clip.
4. The tip of the clip screw and composite deck screw are the same, making them highly versatile.
5. Both HULK clips and composite deck screws are dark in colour, camouflaging them between deck boards.

**Eva-Last® specialised systems: HULK fasteners**

Eva-Last® has developed a range of complete and durable specialised systems that work together with Eva-Last® composite products to ensure the stability and longevity of your deck. Eva-Last® exclusively recommends HULK screws to provide the strongest and most durable fix for both wood and steel. HULK screws are specially coated and designed to fasten clips to a substructure, but can also be used in many other wood and steel fixing applications too.

**HULK decking clips**

HULK decking clips offer a fast and simple installation solution. They are designed for use with HULK screws to provide a hidden fastening system that gives a clean, neat finish to your deck installation.
SCREWS MATCH DECK COLOURS

Material
STAINLESS STEEL

Screw dimensions
5.0 x 63 mm

HEAD - PAN OR WASHER HEAD
To resist screw pullout or sinking too deep into soft materials.

REVERSE THREAD - ROLLET (or a wing may be used instead - see metal)
Removes excess material in cases of top fixing and enlarges the hole within the composite board, making space for expansion and contraction.

SHANK - STANDARD
The shank has no thread. This stops the composite from causing unwanted rotation in the screw, and in cases of clip screws, leaves additional space for the clip, which may allow for the gap between the boards to be reduced.

THREAD - V-THREAD FOR TIMBER
Large threads are able to cut through materials easily and resist pullout.

TIP - TORPEDO OR TYPE 17
Pre-drilling tips allow for the use of the screw without pre-drilling. Torpedo is a HULK-specific tip that makes for quicker, more controlled installation.

HULK multi-purpose fasteners are the best choice for any outdoor, corrosion-risk, or long term application. HULK fasteners™ use an advanced bit lock system which maximises torque transfer, assembly speed as well as the life of bits and screws. HULK fasteners™ are the best choice for deck construction.
EVA-LAST® IS THE WAY OF THE FUTURE AND A MORE SUPERIOR ALTERNATIVE TO TIMBER.

Eva-Last® is a globally trusted brand known for its durable and environmentally friendly product range. We offer ultra-low maintenance and highly weather resistant alternatives to timber; reducing the impact on our forests.

- Made from recycled materials
- No trees felled
- No staining or varnishing
- No toxic chemicals
- Reduced impact on landfills
- Reduced global footprint

Forest Stewardship Council (FSC) certification ensures that products come from responsibly managed forests that provide environmental, social and economic benefits. The diverse fauna and flora who share our forests are given the time and space to recover from our use of their environments.
