## CEO'S COMMENTS

The second quarter of 2015 showed continued good organic sales growth and a higher operating profit compared with the same period a year ago. This is despite a continued challenging business environment, with higher raw material costs mainly owing to the stronger U.S. dollar. The favorable performance has been made possible by continued focus on our three strategic priorities: profitable growth, innovation and efficiency. During the quarter we introduced ten innovations and product launches under brands such as Edet, Okay, Plenty, TENA, Tork and Zewa, at the same time that our work on improving efficiency along the entire value chain continues with undiminished strength.

We continue to invest in emerging markets and have decided to invest approximately SEK 650 m in a new production facility in Brazil for the manufacture of incontinence products. SCA is today the second largest company in the Brazilian market for incontinence products, with the globally leading TENA brand and the local Biofral brand. Brazil, which is one of SCA's prioritized emerging markets, is the third largest retail market in the world for incontinence products.

During the second quarter of 2015, price increases were achieved for consumer tissue in Europe, with gradual effect during the second half of 2015.

Consolidated net sales for the second quarter of 2015 increased by $13 \%$ compared with the same period a year ago. Organic sales growth was $5 \%$, with growth in all business areas. In emerging markets, which accounted for $33 \%$ of sales, organic sales growth was $12 \%$ and in mature markets organic sales growth was $2 \%$.

Consolidated operating profit for the second quarter of 2015, excluding items affecting comparability, gains on forest swaps and currency translation effects, rose $9 \%$ compared with the same period a year ago. The increase is mainly attributable to a better price/mix, higher volumes and cost savings. Raw material costs increased by SEK 435m. The operating margin, excluding items affecting comparability and gains on forest swaps, increased by 0.3 percentage points to $11.0 \%$. Operating cash flow increased by $42 \%$.

Personal Care showed a higher operating profit for the second quarter of 2015 compared with the same period a year ago. Operating profit was favorably affected by a better price/mix, higher volumes and cost savings. Higher raw material costs had a negative impact on earnings as a result of the stronger U.S. dollar and higher pulp prices, which were not fully compensated by lower costs for oil-based raw materials. Tissue showed a higher operating profit owing to a better price/mix, higher volumes and cost savings. Higher raw material costs related mainly to the stronger U.S. dollar had a negative impact on earnings. Operating profit for Forest Products, excluding gains on forest swaps, rose mainly as a result of higher prices (including exchange rate effects) and cost savings.

## GROUP

## MARKET/EXTERNAL ENVIRONMENT

The global market for hygiene products was affected by greater competition, low growth in mature markets and continued favorable growth in emerging markets during the first half of 2015 compared with the same period a year ago. The U.S. dollar strengthened considerably, which among other things led to higher costs for raw materials, such as pulp, purchased in U.S. dollars.

The European and North American markets for incontinence products showed low growth in the institutional and home care sectors, and favorable growth in the retail market during the first half of 2015 compared with the same period a year ago. Emerging markets showed favorable growth in demand for incontinence products. The market for incontinence products was affected by greater competition and campaign activity. In western Europe, demand for baby diapers was stable, while demand for feminine care products decreased slightly. In emerging markets, demand grew for baby diapers and feminine care products. The global market for baby diapers was characterized by intense competition and campaign activity.

The European market for consumer tissue and AfH tissue showed low growth during the first half of 2015 compared with the same period a year ago. In North America, growth was low for AfH tissue, and competition rose as a result of greater investment in production capacity. The Chinese tissue market showed good growth.

In Europe, demand for kraftliner and solid-wood products increased during the first half of 2015 compared with the same period a year ago. Demand in Europe for publication papers continued to fall.

## SALES AND EARNINGS

January-June 2015 compared with corresponding period a year ago
Net sales rose $14 \%$ to SEK $57,177 \mathrm{~m}(50,063)$. Organic sales growth, which excludes exchange rate effects, acquisitions and divestments, was $5 \%$, of which volume accounted for $3 \%$ and price/mix for $2 \%$. Organic sales growth was $3 \%$ in mature markets and 12\% in emerging markets. Emerging markets accounted for $33 \%$ of sales. Exchange rate effects increased sales by $9 \%$.
Operating profit, excluding items affecting comparability, rose 9\% (7\% excluding gains on forest swaps and currency translation effects) to SEK 6,089m (5,564). A better price/mix, higher volumes and cost savings contributed to the earnings growth. Raw material costs increased by SEK $1,142 \mathrm{~m}$, mainly owing to the stronger U.S. dollar. Investments were made in increased marketing activities for incontinence products and in India. Since January 1, 2015, SCA no longer includes gains on forest swaps in the income statement, and thus gains on forest swaps amounted to SEK Om, compared with SEK 327 m in the preceding year. Operating profit for Personal Care, excluding items affecting comparability, increased by $9 \%$ ( $4 \%$ excluding currency translation effects). Operating profit for Tissue, excluding items affecting comparability, increased by $11 \%$ (decrease of $2 \%$ excluding currency translation effects). For Forest Products, operating profit, excluding items affecting comparability, increased by $8 \%$ ( $47 \%$ excluding gains on forest swaps).

Items affecting comparability amounted to SEK -280m (-405) and consist mainly of costs associated with management changes, costs for the termination of an aircraft lease, and integration costs for the Georgia-Pacific acquisition.

Financial items decreased to SEK $-463 \mathrm{~m}(-483)$ as a result of lower interest rates and lower average net debt during the period. Profit before tax, excluding items affecting comparability, rose $11 \%$ ( $3 \%$ excluding currency translation effects) to SEK $5,626 \mathrm{~m}(5,081)$. The tax expense, excluding the effects of items affecting comparability, was SEK $1,457 \mathrm{~m}(1,336)$.

Net profit for the period, excluding items affecting comparability, rose $11 \%$ ( $3 \%$ excluding currency translation effects) to SEK $4,169 \mathrm{~m}(3,745)$. Earnings per share, including items affecting comparability, were SEK 5.23 (4.66).

Return on capital employed, excluding items affecting comparability, was 11.4\% (11.4\%).

## TAX

A tax expense of SEK $1,457 \mathrm{~m}$ is reported for the period, excluding items affecting comparability, corresponding to a tax rate of $26 \%$. The tax expense including items affecting comparability was SEK $1,369 \mathrm{~m}$, corresponding to a tax rate of $25.6 \%$.

## EVENTS DURING THE QUARTER

On June 2, 2015, SCA issued SEK 1.5 bn with a four-year tenor under its Euro Medium Term Note (EMTN) program. The transaction consists of two tranches: a SEK 900 m fixed rate tranche with a yield to maturity of $0.7925 \%$ and a SEK 600 m floating rate tranche priced at three-month STIBOR $+0.50 \%$. The purpose of the transactions is to refinance maturing loans.

During 2014 and 2015 SCA participated in the Volvo Ocean Race via the female Team SCA. This has served as a global marketing platform with women and sustainability in focus, giving SCA opportunities to meet customers, consumers, employees and media representatives. The results have exceeded set targets.

## EVENTS AFTER THE END OF THE QUARTER

On July 16, 2015, SCA announced that the company will invest approximately SEK 650 m in a new production facility in Brazil for the manufacture of incontinence products. Production start is planned for 2016. SCA established a presence in the Brazilian market for incontinence products through an acquisition in 2011. Since then, SCA has grown its sales and market share in Brazil. Today SCA is the second largest company in the Brazilian market for incontinence products, with the globally leading TENA brand and the local Biofral brand. Brazil, which is one of SCA's prioritized emerging markets, is the third largest retail market in the world for incontinence products. The new production facility in Jarinu, Brazil, will replace the existing, smaller facility. SCA had net sales of SEK 514m in Brazil in 2014.

Net sales rose $16 \%$ to SEK $31,526 \mathrm{~m}(27,155)$. Organic sales growth, which excludes exchange rate effects, acquisitions and divestments, was $5 \%$, of which volume accounted for $4 \%$ and price/mix for $1 \%$. Organic sales growth was $1 \%$ in mature markets and $14 \%$ in emerging markets. Emerging markets accounted for $32 \%$ of sales. Exchange rate effects increased sales by $11 \%$.

For consumer tissue, organic sales growth was 6\%. Emerging markets, particularly China, showed high growth in sales. For AfH tissue, organic sales growth was $2 \%$. The increase was mainly related to North America.

Operating profit, excluding items affecting comparability, rose 11\% (decrease of $2 \%$ excluding currency translation effects) to SEK $3,382 \mathrm{~m}(3,045)$. Higher volumes, a better price/mix and cost savings contributed to the earnings increase. Higher raw material costs mainly resulting from the stronger U.S. dollar had a negative earnings impact.

Return on capital employed, excluding items affecting comparability, was $12.5 \%$ (12.7\%).

The operating cash surplus increased to $\operatorname{SEK} 5,119 \mathrm{~m}(4,554)$. Operating cash flow increased to SEK $3,332 \mathrm{~m}(2,492)$. The increase is mainly attributable to a higher operating cash surplus and a lower level of tied-up working capital.

## Second quarter 2015 compared with second quarter 2014

Net sales rose $15 \%$ to SEK $16,091 \mathrm{~m}(14,039)$. Organic sales growth was $4 \%$, of which price/mix accounted for $1 \%$ and volume for $3 \%$. Organic sales growth was $0 \%$ in mature markets and $13 \%$ in emerging markets. Emerging markets accounted for $33 \%$ of sales. Exchange rate effects increased sales by $11 \%$.

For consumer tissue, organic sales growth was 5\%. Emerging markets, particularly China, showed high growth in sales. For AfH tissue, organic sales growth was $1 \%$ and was attributable to emerging markets and North America, which compensated for lower sales in western Europe.

Operating profit, excluding items affecting comparability, rose 11\% (decrease of $1 \%$ excluding currency translation effects) to SEK $1,826 \mathrm{~m}$ ( 1,652 ). Higher volumes, a better price/mix, cost savings and lower energy costs had a positive earnings impact. Higher raw material costs mainly resulting from the stronger U.S. dollar had a negative earnings impact.

Auditor's review report on interim financial information in summary (interim report), prepared in accordance with IAS 34 and Ch. 9 of the Swedish Annual Accounts Act

## Introduction

We have reviewed this report for Svenska Cellulosa Aktiebolaget SCA (publ) as per June 30, 2015, and the sixmonth period then ended. The board of directors and the CEO are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

## Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements, ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing (ISA) and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion based on a review does not give the same level of assurance as a conclusion based on an audit.

## Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Annual Accounts Act for the Group, and in accordance with the Annual Accounts Act for the Parent Company.

## NOTES

## 1 ACCOUNTING PRINCIPLES

This interim report has been prepared in accordance with IAS 34 and recommendation RFR 1 of the Swedish Financial Reporting Board (RFR), and with regard to the Parent Company, RFR 2.

Effective January 1, 2015, SCA applies the following new or amended IFRSs:

- Amendments to IAS 19: Defined Benefit Plans: Employee Contributions
- Annual Improvements to IFRSs 2010-2012 Cycle
- Annual Improvements to IFRSs 2011-2013 Cycle

These standards are not judged to have any material impact on the Group's or Parent Company's result of operations or financial position.

In other respects, the accounting principles applied correspond to those described in the 2014 Annual Report.

## 2 RISKS AND UNCERTAINTIES

SCA's risk exposure and risk management are described on pages 78-83 of the 2014 Annual Report. No significant changes have taken place that have affected the reported risks.

Risks in conjunction with company acquisitions are analyzed in the due diligence processes that SCA carries out prior to all acquisitions. In cases where acquisitions have been carried out that may affect the assessment of SCA's risk exposure, these are described under the heading "Other events" in interim reports.

## Risk management processes

SCA's board decides on the Group's strategic direction, based on recommendations made by Group management. Responsibility for the long-term, overall management of strategic risks corresponds to the company's delegation structure, from the Board to the CEO and from the CEO to the business unit presidents. This means that most operational risks are managed by SCA's business units at the local level, but that they are coordinated when considered necessary. The tools used in this coordination consist primarily of the business units' regular reporting and the annual strategy process, where risks and risk management are a part of the process.

SCA's financial risk management is centralized, as is the Group's internal bank for the Group companies' financial transactions and management of the Group's energy risks. Financial risks are managed in accordance with the Group's finance policy, which is adopted by SCA's board and which - together with SCA's energy risk policy - makes up a framework for risk management. Risks are aggregated and monitored on a regular basis to ensure compliance with these guidelines. SCA has also centralized other risk management.

SCA has a staff function for internal audit, which monitors compliance in the organization with the Group's policies.

## 3 RELATED PARTY TRANSACTIONS

No transactions have been carried out between SCA and related parties that have had a material impact on the company's financial position and results of operations.

The fair value of trade receivables, other current and non-current receivables, cash and cash equivalents, trade payables and other current and non-current liabilities is estimated to be equal to their book value. The total fair value of financial liabilities amounts to SEK $41,390 \mathrm{~m}(39,243)$.

No transfers between level 1 and 2 were made during the period.
The fair value of financial instruments is calculated based on current market quotations on the balance sheet date. The value of derivatives is based on published prices in an active market. The fair value of debt instruments is set using valuation models, such as discounting of future cash flows to quoted market interest rates for the respective durations.
