CEO'S COMMENTS

The third quarter of 2015 showed good organic sales growth, a higher operating profit and a higher operating cash flow compared with the same period a year ago.

The past few months have been eventful, during which we made a number of important, strategic decisions. To further intensify the focus on the Group's two operations, SCA has decided to initiate a dividing of the Group into two divisions: a Hygiene division and a Forest Products division. As of January 1, 2017, the Forest Products division will expand its quarterly financial reporting. In Forest Products, we have decided to invest in increased capacity for pulp production at the Östrand pulp mill in Sweden. Over time, the investment in Östrand will increase sales and competitiveness and create a world-class cost position and higher margins.

To accelerate growth and the pace of innovation as well as to further strengthen the competitiveness of SCA's hygiene operations, we have also decided to implement an enhancement of our hygiene organization, effective January 1, 2016. In October we announced that SCA is acquiring Wausau Paper Corp., a North American Away-from-Home tissue company. Wausau Paper's product portfolio complements SCA's offerings in North America and gives us access to premium tissue in the region. We expect the acquisition to generate benefits for SCA and our customers. The transaction is subject to Wausau Paper shareholder and regulatory approvals, and is expected to close during the first quarter of 2016.

In Asia, which is an important growth market with a large population and low penetration of hygiene products, we strengthen the collaboration with Vinda by divesting our business in South East Asia, Taiwan and South Korea for integration with Vinda. The transaction enables us to further leverage on our strengths to build a leading Asian hygiene business.

We have continued to address areas for improvement. Against the backdrop of declining global demand for publication papers over several years and weak profitability at the Ortviken paper mill, we intend to close one newsprint machine at Ortviken paper mill in Sundsvall, Sweden. We will also recognize an impairment loss for the mill. We are divesting our baby diaper operation in South Africa, which has had unsatisfactory profitability. In addition, we have addressed our brand valuation in relation to our baby diaper operation in Mexico and the Everbeauty acquisition in Asia, which has entailed impairment losses. We are divesting our ownership in Bromma Business Jet and have recognized costs for this during the third quarter. The sale is in line with SCA's previous announcement that the Group will not own business jets.

As part of SCA's ongoing cost-savings program related to the acquisition of Georgia-Pacific's European tissue operations, in October we closed our tissue production plant in Saint-Cyr-en-Val, France. The closure gave rise to restructuring costs during the third quarter 2015.

Also during the quarter, SCA was included in Dow Jones Sustainability Indices, one of the world's most prestigious sustainability rankings. SCA was named industry leader in the Household Products sector.

Consolidated net sales for the third quarter of 2015 increased by 9% compared with the same period a year ago. Organic sales growth was 5% as a result of favorable growth for both Personal Care and Tissue. In emerging markets, which accounted for 32% of sales, organic sales growth was 12%, and in mature markets organic sales growth was 3%. During the quarter we introduced eight innovations and product launches under the Drypers, Libero, Tempo, TENA and Tork brands.

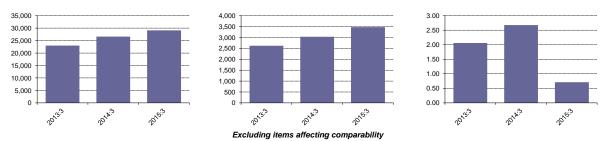

Consolidated operating profit for the third quarter of 2015, excluding items affecting comparability and currency translation effects, rose 10% compared with the same period a year ago. The increase is mainly attributable to a better price/mix, higher volumes and cost savings. Raw material costs increased by SEK 758m, mainly due to the stronger U.S. dollar. The operating margin, excluding items affecting comparability, increased by 0.5 percentage points to 11.9%. Operating cash flow increased by 7%. Return on capital employed, excluding items affecting comparability, grew by 1.4 percentage points to 12.8%.

Both Personal Care and Tissue showed a higher operating profit for the third quarter of 2015 compared with the same period a year ago. Operating profit was favorably affected by a better price/mix, higher volumes and cost savings. Higher raw material costs had a negative impact on earnings mainly owing to the stronger U.S. dollar. Operating profit for Forest Products rose mainly as a result of higher prices (including exchange rate effects), cost savings and lower raw material and energy costs.

NOTES

1 ACCOUNTING PRINCIPLES

This interim report has been prepared in accordance with IAS 34 and recommendation RFR 1 of the Swedish Financial Reporting Board (RFR), and with regards to the Parent Company, RFR 2.

Effective January 1, 2015, SCA applies the following new or amended IFRS:

- Amendments to IAS 19: Defined Benefit Plans: Employee Contributions
- Annual Improvements to IFRSs 2010–2012 Cycle
- Annual Improvements to IFRSs 2011–2013 Cycle

These standards are not judged to have any material impact on the Group's or Parent Company's result of operations or financial position.

In other respects, the accounting principles applied correspond to those described in the 2014 Annual Report.

2 RISKS AND UNCERTAINTIES

SCA's risk exposure and risk management are described on pages 78–83 of the 2014 Annual Report. No significant changes have taken place that have affected the reported risks.

Risks in conjunction with company acquisitions are analyzed in the due diligence processes that SCA carries out prior to all acquisitions. In cases where acquisitions have been carried out that may affect the assessment of SCA's risk exposure, these are described under the heading "Other events" in interim reports.

Risk management processes

SCA's board decides on the Group's strategic direction, based on recommendations made by Group management. Responsibility for the long-term, overall management of strategic risks corresponds to the company's delegation structure, from the Board to the CEO and from the CEO to the business unit presidents. This means that most operational risks are managed by SCA's business units at the local level, but that they are coordinated when considered necessary. The tools used in this coordination consist primarily of the business units' regular reporting and the annual strategy process, where risks and risk management are a part of the process.

SCA's financial risk management is centralized, as is the Group's internal bank for the Group companies' financial transactions and management of the Group's energy risks. Financial risks are managed in accordance with the Group's finance policy, which is adopted by SCA's board and which – together with SCA's energy risk policy – makes up a framework for risk management. Risks are aggregated and monitored on a regular basis to ensure compliance with these guidelines. SCA has also centralized other risk management.

SCA has a staff function for internal audit, which monitors compliance in the organization with the Group's policies.

3 RELATED PARTY TRANSACTIONS

No transactions have been carried out between SCA and related parties that have had a material impact on the company's financial position and results of operations.

No transfers between level 1 and 2 were made during the period.

The fair value of financial instruments is calculated based on current market quotations on the balance sheet date. The value of derivatives is based on published prices in an active market. The fair value of debt instruments is set using valuation models, such as discounting of future cash flows to quoted market interest rates for the respective durations.

5 ACQUISITIONS AND DIVESTMENTS

In July SCA signed an agreement to acquire the remaining 50% of the jointly owned South African subsidiary Sancella S.A. from Nampak. The purchase consideration amounts to SEK 1. SCA has since previously reported Sancella S.A. as a subsidiary, which is why the acquisition will be accounted for as an equity transaction. In conjunction with this SCA and Nampak signed an agreement to divest Sancella S.A.'s baby diaper operation to a South African company. The transactions are expected to close during the fourth quarter of 2015 after approval from the pertinent authorities. Pending completion of the sale of the baby diaper operation, the operation will be reported as a non-current asset held for sale.

Acquisition after the end of the reporting period

On October 13, 2015, SCA announced that it will acquire Wausau Paper, one of the largest producers of Awayfrom-Home tissue in the North American market, for total consideration of USD 513m (approximately SEK 4.2 billion) in cash. Completion of the transaction is subject to Wausau Paper shareholder and regulatory approvals. Closing is expected to take place during the first quarter of 2016.

A preliminary purchase price allocation will be prepared for Wausau Paper once the bid has been approved by Wausau Paper's shareholders and the authorities.
