SCA stops PM5 at Ortviken paper mill

Wednesday January 20, 2021, the last roll of paper was produced on SCA's paper machine 5 at Ortviken paper mill in Sundsvall.

PM5 produced uncoated publication paper for newspapers, magazines and commercial print and had a capacity of 255,000 tonnes per annum. The paper machine started production in the year 1985. PM5 will now be dismantled in order to make room for the company Renewcell and its recycling of textile fibre, which is expected to come on stream on the Ortviken site in 2022.

As previously announced, the remaining two paper machines at the Ortviken paper mill will stop production during the first quarter of 2021, as SCA ceases to produce publication paper.

The core of SCA's business is the forest, Europe's largest private forest holding. Around this unique resource, we have built a well-developed value chain based on renewable raw material from our own and others' forests. We offer paper for packaging and print, pulp, wood products, renewable energy, services for forest owners and efficient transport solutions. 2019 the forest products company SCA had approximately 4,000 employees and sales amounted to approximately SEK 19.6 bn (EUR 1.9 bn). SCA was founded in 1929 and has its headquarters in Sundsvall, Sweden. For more information, visit www.sca.com
