

Find R&D Centre in Sundsvall

By plane

The Sundsvall-Härnösand airport is situated 15 miles north of Sundsvall city. From the airport there are several alternatives by taxi.

By train

There are several daily departures from Stockholm to Sundsvall. The trains stop at Sundsvall Central station which is located close to Sundsvall city center. Some trains also stop at "Sundsvall Västra station", which is nearer R&D Centre.

By car on E4 from the south

When you enter Sundsvall (the Central train station on your left hand side) just drive straight ahead and at the end of Köpmangatan (a big school in front of you), turn right by the traffic lights and choose the left lane. When you get to the roundabout turn left and follow Storgatan to the next roundabout where you turn left again. Now you can see our building to your right, the entrance facing the roundabout.

By car on E4 from the north

Follow E4 to Sundsvall. Turn right at the first traffic lights and follow the sign "Centrum" until you get to a roundabout, where you turn left. In the next roundabout you turn right and follow Storgatan to yet another roundabout where you turn left again. Now you can see our building to your right, the entrance facing the roundabout.

Parking

Pass the R&D building on Sidsjövägen and you will find a large parking lot to your right (just before the railway). Park your car at space 1-70. Read more about parking.
